PRIMARY EXAMINER

DETAILED ACTION

1. This is in response to Applicant's amendment submitted on 6/28/06, with respect to claims 1-3, 5-14, 16-18, 20-27 and 29-30 have been fully considered and are persuasive. Therefore, the rejection of last Office action has been withdrawn.

Claims 4, 15, 19 and 28 have been canceled.

Claims 1-3, 5-14, 16-18, 20-27 and 29-30 remain pending for examination.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims 1-3, 5-14, 16-18, 20-27 and 29-30 are allowed over the prior art of record.

With respect to claims 1, 16 and 25 the claimed features "a method for estimating a selectivity of a query containing at least one column-associated condition related to column attributes of a relational database table, the method comprising generating a dataset by sampling a plurality of queries applied against the database, wherein the dataset includes a plurality of query conditions and information related to combinations of said query conditions, calculating a cardinality estimate CE of said query with the following formula:

 $CE = \sum_{i=1,...L} f(Z_i)$ wherein $f(Z_i)$ is a regression function, CE is a total of correlations between the plurality combinations of elementary operations used in said sampled queries, and Z_i is a frequency of occurrence for one or more column-associated condition c_{jk} , and wherein said regression function is updated using said data mining model" in combination with other element of the independent claims would not found anticipated or obvious over the prior art made of record.

The dependent claims, being definite, further limiting, and fully enabled by the specification are also allowed.

Art Unit: 2162

The closest prior art, Schiefer et al., U.S. Patent No. 5,761,653 relates to database management systems and more particularly to a method for estimating key cardinalities for query processing in a relational database management system. Lise Getoor et al., relates to selectivity estimation using probabilistic models, estimating the result size complex queries that involve selection on multiple attributes but fail to teach the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONTACT INFORMATION

2. Any inquiry concerning this communication or earlier communications from the examiner should

be directed to JEAN B. FLEURANTIN whose telephone number is 571 - 272-4035. The examiner can

normally be reached on 7:05 to 4:35.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

JOHN E BREENE can be reached on 571 – 272-4107. The fax phone number for the organization where

this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application

Information Retrieval (PAIR) system. Status information for published applications may be obtained from

either Private PAIR or Public PAIR. Status information for unpublished applications is available through

Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC)

at 866-217-9197 (toll-free).
